ABSTRACT:

PROBLEM TO BE SOLVED: To provide a device for protecting copyright of a moving image by inserting watermark information such as a copyright display and copy limit information to the moving image by the simple and inexpensive system.

SOLUTION: The device is provided with a means 1 that selects a frame to which watermark information is inserted at an indefinite interval by which the watermark information is not visually recognized as a moving image when the watermark information is inserted to part of frames among a plurality of frames of the moving image and with a means 2 that inserts watermark information visually recognized as a still image to a selected frame. Copy limit information is inserted to a control data recording area of a moving image.
